Forecast for Friday 06 Dec 2024

Weather: A dry start with bright spells. Clouding over from the west through late morning ahead of Storm Darragh arriving around midday bringing persistent heavy rain, preceded initially by summit snow, and gale to storm force south to southeast winds. A small chance of thunder in the evening.

Chance of cloud-free hill tops above 700m: 80% or higher at first, falling to 20% or lower from midday.

Low cloud and visibility: Good visibilities and clear summits to start, but cloud becoming extensive down to 400-600m and visibilities falling poor in persistent heavy rain or summit snow.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Conditions deteriorate markedly during the afternoon. Walking will be extremely difficult on exposed ground with a high risk of being blown over. Feeling bitterly cold in the wind and rain. Underfoot conditions may become dangerous and slippery as a result of persistent heavy rain.

Forecast for Saturday 07 Dec 2024

Weather: Storm Darragh continues to bring very strong winds and occasionally heavy rain through the morning, wintry above 700m. Brighter spells break out as conditions becoming more showery as we go through the day, but freezing levels gradually falling.

Maximum wind: North to northwesterly average winds in excess of 70mph and gusts over 90mph in the morning

Chance of cloud-free hill tops above 700m: Little chance at first, rising to 60-70% in the afternoon.

Low cloud and visibility: Widespread cloud down to 400-600m in the morning with poor visibilities in persistent rain or summit snow. Cloud becomes more broken through the afternoon, with some clear spells developing between showers.

Temperature: **Valleys:** Plus 4 rising to plus 7 Celsius.
At 700m: Zero to plus 2 Celsius.
Freezing level: Above summits in the early hours, falling to 600m.
